

Care Home Marketing Disclaimer:

Care Home Digital Marketing provides marketing services specifically designed to support care homes with their digital presence, branding, and promotional strategies.

We are marketing specialists, not care providers or healthcare professionals.

Nothing on this website, in our content, or within our services should be interpreted as advice or guidance related to the delivery of hands-on care, medical treatment, or clinical practices.

All marketing materials and campaigns created by us are intended solely to enhance visibility, engagement, and communication for care sector businesses.

While we are not involved in the provision of care, we do have personal experience of loved ones living with dementia, as well as those we have sadly lost due to dementia-related illness.

This personal connection drives our deep respect for the care sector and fuels our commitment to helping care homes share their vital work with the world.

For matters relating to the delivery of care, we strongly advise consulting qualified care professionals or relevant regulatory bodies.

Email us at **info@carehomedigitalmarketing.co.uk** with your details, and let us know a convenient time for a chat about how we can support your digital marketing needs.
